Requirements
Analysis, Web
Design, **C#,**
Ruby, .NET
Infrastructure
Systems,
Linux, Cloud
Services,
SQL, Modeling

Learn more about this **free** community event at:

BoiseCodeCamp.org

This **free-to-the-community** event just keeps getting better and better! This year we've got two major tracks, almost like two events in one; classic Code Camp and now Tech Fest. There is definitely something for everyone.

Code Camp is created by software developers, for developers of all levels. Code Camp sessions will be in the Micron Engineering Building this year. Whether you are interested in a fundamentals session on databases or the latest in dynamic languages, we'll have something for you.

Tech Fest is a set of sessions occurring just across the street from Code Camp in the Student Union Building. Tech Fest recognizes there are more facets to technology than just writing code, and includes content for IT professionals, networking specialists, designers, project and program managers, and anyone else in the industry. Now Code Camp has a twin event that helps cover the whole technology industry.

2010 is bigger and better, with two great events in one! There are plenty of ways to get involved and opportunities for everyone including presenting a session, helping with logistics, or corporate sponsorship.
