

COPYRIGHT LAW QUIZ

True or False?

1. You can copyright your code by placing a “circle c” (“©”) in the body of the source code.
2. Once you copyright your code by placing a © on it, no one can copy it or steal it.
3. Under the work for hire doctrine, the copyright is owned by whoever pays for the work.
4. Copyright is automatically secured on first publication under the Berne Convention.
5. Everything on the web is in the public domain.
6. You are free to claim copyright ownership of code you write based on a GPL kernel.
7. It is important that you timely register your copyrights.
